SUMMARY

Information Science Engineering student with hands-on experience building full-stack web applications and data-driven projects using Python, SQL, React, Node.js, Express, and MongoDB. Passionate about Data Science, Analytics, and Machine Learning with practical experience in deploying cloud-based applications using Vercel and Render. Strong foundation in data structures, databases, and problem solving.

EDUCATION

Bachelor of Information Science Engineering <i>Global Academy Of Technology</i> 8.76/10	07/2027 BENGALURU
Science(PCMC) <i>Indian National PU College</i> 93%	03/2023 BENGALURU
SSLC Sri Kumaran Children's Home 92%	07/2021 BENGALURU

SKILLS

Programming Java, C, Python(basic), SQL	Database MySQL, MongoDB
Core Concepts Computer Networks, DBMS, Operating Systems, OOPS, Database concepts, CRUD operations	Soft Skills Quick learner, analytical mindset, teamwork
Web Technologies HTML, CSS, JavaScript, React.js, Node.js, Express.js	
Tools Git, VS Code, Render, Vercel, Eclipse	

CERTIFICATES

- Power BI - Simplilearn • Getting Started with AWS – Simplilearn
- Artificial Intelligence Foundation – Infosys Springboard Python for DSA – Infosys Springboard

PROJECTS

AI-Powered Job Market Intelligence & Skill Gap Analyzer

GitHub: https://github.com/srikanthnas/job_intel

Live Demo: <https://job-intel-ten.vercel.app>

Tech Stack: Python, Pandas, Scikit-learn, Flask, React, Machine Learning

- Analysed 25,000+ job postings to identify skill demand and hiring trends.
- Built a salary prediction model using machine learning.
- Developed a skill-gap analyser comparing resumes with job requirements.
- Created an interactive dashboard for salary, skills, and hiring insights.
- Exposed analytics through REST APIs.

Samvad- Civic Connect Platform

GitHub: <https://github.com/srikanthnas/Samvad>

Live Demo: <https://samvad-ten.vercel.app>

Tech Stack: React, Node.js, Express.js, MongoDB Atlas, Mongoose, Render, Vercel

- Built a full-stack civic issue reporting platform enabling citizens to report and track public issues.
- Developed REST APIs using Express.js and MongoDB Atlas.
- Implemented CRUD operations with Mongoose ODM.
- Deployed the frontend on Vercel and backend on Render.
- Configured CORS and environment variables for secure communication.

Health DigiTwin – AI Health Forecasting System

GitHub: <https://github.com/srikanthnas/health-digitwin>

Live Demo :<https://health-digitwin-bm7p.vercel.app>

- Built an AI-powered health prediction platform using React, Flask, TensorFlow, and MongoDB.
- Developed an LSTM model to predict fatigue, stress, energy, sleep quality, and burnout risk.
- Supported natural-language health log input.
- Generated personalized explanations for predictions.
